SUSTAINABLE BUSINESS PRACTICES

SUSTAINABLE BUSINESS PRACTICES

RECYCLING

Paper and cardboard used throughout the office are recycled throughout the office.

This means less waste leaves the building and goes to the landfill.

SUSTAINABLE BUSINESS PRACTICES

RECYCLING

PET plastic used to make cards in the USA is a more sustainable plastic than other plastics. It is a safer option that does not off-gas.

All scrap material from the factory is recycled by being reground post-production.

The reground plastic is used to make new plastic at Contempo USA.

This means less waste leaves the building and goes to the landfill.

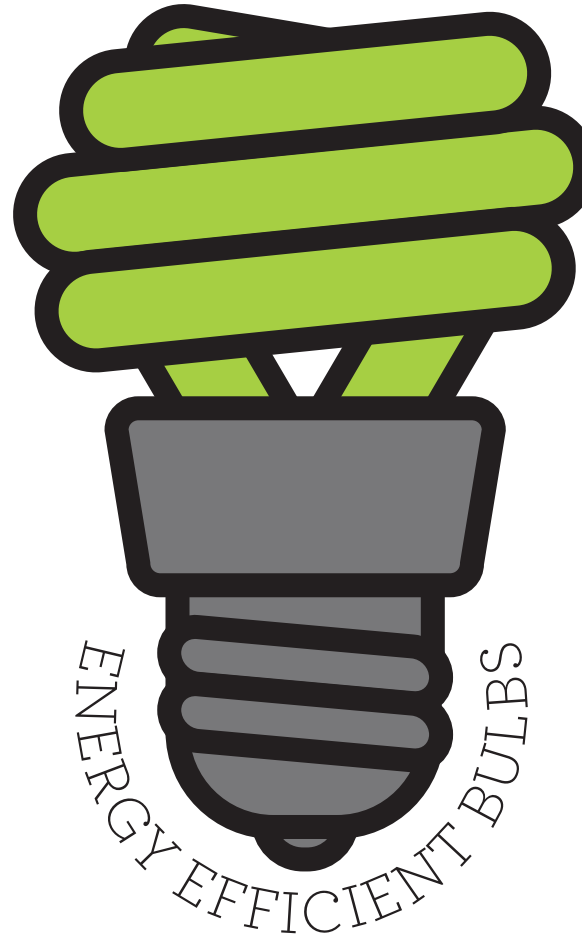

SUSTAINABLE BUSINESS PRACTICES

ENERGY

Lighting throughout the building uses energy efficient LED bulbs.

This saves energy and cost to replace bulbs.

CONTEMPO

SUSTAINABLE BUSINESS PRACTICES

MATERIAL

FSC certified paper board is used for all USA production.

FSC

100%

From well-managed forests

Want to increase the chances of your packaging being recycled?

How2Recycle

www.how2recycle.info

The How2Recycle Label program is designed to “reduce confusion by creating a clear, well-understood, and nationally harmonized label that enables companies to convey to consumers how to recycle a package. Improve the reliability, completeness, and transparency of recyclability claims. Provide a labeling system that follows Federal Trade Commission Green Guides. Increase the availability and quality of recycled material.”

Preparing Material for Recycling

Information is provided to ensure the proper steps are taken to effectively recycle materials.

How2Recycle

Information and locational instructions let you know if an item can be recycled traditionally or by other means.

Type of Recyclable Material

Lists what type of material the packaging is made from.

Lists Recyclable Parts of Packaging

Information on what parts of the packaging needs to be recycled in this specific way.
